

Function of Felicitation of Trustees of Mumbai Obstetrician & Gynaecological Society (MOGS) on 15/07/2018

Thank you Dr. Pandit for this kind gesture & thank you Dr. Niranjan Chavan for taking such pains to execute this idea.

On this occasion, I would like to share with you my thoughts of a “Rosebud Blooming”.

Rosebud Blooming

When you enter MOGS you are a young ObGyn specialist full of potential like a Rosebud. As you go through MOGS you blossom out. This is because of your hard work, your inherent abilities & your ideas. In fact you utilise your entire “Intellectual Property” towards your commitment to MOGS. Here I must add that Destiny plays a role. This is what I learned up from Bipin Pandit’s inspiring Presidential address & I must thank him for that.

What the Organisation does is, it nurtures you & gives you a platform to show your talents & abilities. MOGS gains immensely by your contribution.

We always say that MOGS is a splendid edifice built over the years. But what is this edifice? It is not bricks & mortar nor is it flesh & blood. It is an abstract entity which has great prestige & honour & above all serves both the community & Science. MOGS is today what it has become because of the efforts of all its Members. So dear friends, it is a win – win situation for all.

Here, I would like to say that every single Member contributes to the prestige & honour of our organisation & not only those who hold a post or are office bearers. Just by being present in a large numbers and participating in activities you are playing a dynamic role in the status of MOGS.

So I would like to acknowledge all those who have lent their intellectual property without any reservation & made MOGS the great organisation that it is today.

I would like to quote the simple words of Helen Keller who has said
“Alone we can do so little
Together we can do so much.”

So let us all continue to work together in peace, harmony & allow each other to blossom from a Rosebud to fully grown Rose. As you all know Roses spread goodwill & cheer.
